Subject Index

Absorbance changes
light-induced absorbance changes in extracts of *Phycomyces* sporangiophores: modification in night-blind mutants, 305
Action spectra
biphasic fluence-response curves and derived action spectra for light-induced absorbance changes in *Phycomyces* mycelium, 169
photomechanical transduction in *Amoeba proteus*: an action spectrum, 203
photomotile responses of *Blepharisma japonicum* I: Action spectra determination and time-resolved fluorescence of photoreceptor pigments, 75
Active oxygen
inhibition of chloroplast photooxidation by flavonoids and mechanisms of the antioxidative action, 451
Aggregation state
time-resolved fluorescence spectroscopy of hematoporphyrin, mesoporphyrin, pheophorbide *a* and chlorin e_6 in ethanol and aqueous solution, 103
Amoeba proteus
photomechanical transduction in *Amoeba proteus*: an action spectrum, 203
Amoeboid motion
photomechanical transduction in *Amoeba proteus*: an action spectrum, 203
Angelicins
photodimerization of 4,6,4′-trimethylangelicin and 6,5-dimethylangelicin, 213
Art works
diffuse reflectance spectroscopy: an application to the analysis of art works, 132
Ascorbate
photoinduced electron transfer in pheophytin-containing liposomes, 85
ATP level
photodynamic effects of hematoporphyrin-derivative on enzyme activities of murine L929 fibroblasts, 61
Autoradiography
UV-induced unscheduled DNA synthesis in human skin: dose response, correlation with erythema, time course and split dose exposure *in vivo*, 33

Bacteriochlorophyll
photophysical studies of bacteriochlorophyll *a* and bacteriopheophytin *a* — singlet oxygen generation, 93
Bacteriopheophytin
photophysical studies of bacteriochlorophyll *a* and bacteriopheophytin *a* — singlet oxygen generation, 93
Bacteriorhodopsin
charge motion in vacuum-dried bacteriorhodopsin, 469
Bilirubin
phototoxic effects of bilirubin, 373
tin-protoporphyrin and neonatal jaundice, 127
Bipartite cuvette
internal brightness of disk-shaped samples, 337
Blepharisma japonicum
photomotile responses of *Blepharisma japonicum* I: Action spectra determination and time-resolved fluorescence of photoreceptor pigments, 75
Blue light
light-induced absorbance changes in extracts of *Phycomyces* sporangiophores: modifications in night-blind mutants, 305
Blue-light photoreceptors
biphasic fluence-response curves and derived action spectra for light-induced absorbance changes in *Phycomyces* mycelium, 169

© Elsevier Sequoia/Printed in The Netherlands

photomechanical transduction in *Amoeba proteus*: an action spectrum, 203
the role of flavins as photoreceptors, 277

Carotenoids
inhibition of chloroplast photooxidation by flavonoids and mechanisms of the antioxidative action, 451
Cell death
photodynamic effects of hematoporphyrin-derivative on enzyme activities of murine L929 fibroblasts, 61
Chlamydomonas reinhardii
pigment–protein complexes of green algae: improved methodological steps for the quantification of pigments in pigment–protein complexes derived from the green algae *Chlorella* and *Chlamydomonas*, 475
Chl-*b*-deficient mutant pg 113
pigment–protein complexes of green algae: improved methodological steps for the quantification of pigments in pigment–protein complexes derived from the green algae *Chlorella* and *Chlamydomonas*, 475
Chlorella fusca
pigment–protein complexes of green algae: improved methodological steps for the quantification of pigments in pigment–protein complexes derived from the green algae *Chlorella* and *Chlamydomonas*, 475
Chlorins
time-resolved fluorescence spectroscopy of hematoporphyrin, mesoporphyrin, pheophorbide *a* and chlorin e_6 in ethanol and aqueous solution, 103
Chlorophyll
inhibition of chloroplast photooxidation by flavonoids and mechanisms of the antioxidative action, 451
synchronous cultures of the green alga *scenedesmus obliquus*: comparison of picosecond decay associated emission spectra and fluorescence induction kinetics, 247
Chloroplasts
inhibition of chloroplast photooxidation by flavonoids and mechanisms of the antioxidative action, 451
the topological origin of the R and S phases of electric-field-induced luminescence in chloroplasts and blebs, 295
Chromatography
porphyrin derivatives having physical and chemical characteristics similar to those of the active components of hematoporphyrin derivative and with very strong photosensitizing effects, 241
CIDEP
a CIDEP and fluorescence study of the oxidation of vitamin E: the vitamin E radical cation, 229
Ciliates
ecological consequences of photomovement in microorganisms, 385
Cryptomonas
phototaxis in the marine flagellate *Cryptomonas maculata*, 115
Cryptophyceae
phototaxis in the marine flagellate *Cryptomonas maculata*, 115
Ctenanthe compressa
internal brightness of disk-shaped samples, 337
Cyanobacteria
ecological consequences of photomovement in microorganisms, 385
Cycloadditions
photodimerization of 4,6,4′-trimethylangelicin and 6,5-dimethylangelicin, 213
Cytochrome *f*
oxidation–reduction kinetics of cytochrome *f* in whole cells, 45

Delivery systems
delivery systems for hydrophobic drugs, 494
DNA octamer
photoreactivation of the thymine dimer containing DNA octamer

d(GCGT$\hat{T}$TGCG).d(CGCAACGC) by the photoreactivating enzyme from *Anacystis nidulans*, 323
DNA repair
recA-dependent DNA repair in UV-irradiated *Escherichia coli*, 1

Electric field
the topological origin of the R and S phases of electric-field-induced luminescence in chloroplasts and blebs, 295
Electroluminescence
the topological origin of the R and S phases of electric-field-induced luminescence in chloroplasts and blebs, 295
Electron transport
oxidation–reduction kinetics of cytochrome *f* in whole cells, 45
oxygen evolution of synchronous *Chlorella* under continuous and flash illumination, 447
Energy transfer
comparative characterization of the substrate-binding subsites in subtilisins DY and Carlsberg by fluorescence and kinetic studies, 461
Enzyme activities
photodynamic effects of hematoporphyrin-derivative on enzyme activities of murine L929 fibroblasts, 61
Enzyme photoactivation
the role of flavins as photoreceptors, 277
Escherichia coli
recA-dependent DNA repair in UV-irradiated *Escherichia coli*, 1
ESR
a CIDEP and fluorescence study of the oxidation of vitamin E: the vitamin E radical cation, 229
Excimer-pumped dye lasers
two-step photoactivation of hematoporphyrin by excimer-pumped dye-laser pulses, 181
Excision repair
UV-induced unscheduled DNA synthesis in human skin: dose response, correlation with erythema, time course and split dose exposure *in vivo*, 33

Fern-spore germination
light-induced fern-spore germination: effect of spore age on responsivity to light, 415
Fibre optic probe
internal brightness of disk-shaped samples, 337
Fibroblasts
photodynamic effects of hematoporphyrin-derivative on enzyme activities of murine L929 fibroblasts, 61
Flagellates
ecological consequences of photomovement in microorganisms, 385
Flash photolysis
singlet oxygen production and photoisomerization: two competitive processes for merocyanine 540 irradiated with visible light, 437
Flavins
the role of flavins as photoreceptors, 277
Flavin photoreactions
flavin-mediated photoinactivation of spinach leaf nitrate reductase involving superoxide radical and activating effect of hydrogen peroxide, 195
Flavoproteins
the role of flavins as photoreceptors, 277
Fluorochromes
high contrast fluorescence imaging using two-wavelength laser excitation and image processing, 130
Fluorescein
the effects of enzymes on the photobleaching of fluorescein and fluorescein isothiocyanate conjugates, 361
Fluorescence
a CIDEP and fluorescence study of the oxidation of vitamin E: the vitamin E radical cation, 229
Fluorescence decay
synchronous cultures of the green alga *Scenedesmus obliquus*: comparison of picosecond decay associated emission spectra and fluorescence induction kinetics, 247
Fluorescence lifetimes
photomotile responses of *Blepharisma japonicum* I: Action spectra determination and time-resolved fluores-

cence of photoreceptor pigments, 75
Fluorescence quenching
comparative characterization of the substrate-binding subsites in subtilisins DY and Carlsberg by fluorescence and kinetic studies, 461
Furocoumarins
photodimerization of 4,6,4′-trimethylangelicin and 6,5-dimethylangelicin, 213
tetrahydrobenzo-4,6-dimthylangelicin: a new angular furocoumarin forming inter-strand photo-cross-links, 123
triplet state properties and triplet-state-oxygen interactions of some linear and angular furocoumarins, 315

Germanium avalanche photodiodes
detection of singlet oxygen luminescence with germanium avalanche photodiodes, 129
Glutathione
photodynamic effects of hematoporphyrin-derivative on enzyme activities of murine L929 fibroblasts, 61
Green algae
oxidation–reduction kinetics of cytochrome *f* in whole cells, 45
synchronous cultures of the green alga *Scenedesmus obliquus*: comparison of picosecond decay associated emission spectra and fluorescence induction kinetics, 247
Growth and division
partial tRNA deacylation specifically triggers *Escherichia coli* cell volume reduction, 13

Hematoporphyrin
two-step photoactivation of hematoporphyrin by excimer-pumped dye-laser pulses, 181
Hematoporphyrin derivative
laser-induced multiphoton fluorescence of hemoglobin, 329
photodynamic effects of hematoporphyrin-derivative on enzyme activities of murine L929 fibroblasts, 61
Hematoporphyrin ethers
porphyrin derivatives having physical and chemical characteristics similar to those of the active components of hematoporphyrin derivative and with very strong photosensitizing effects, 241
Hemoglobin
laser-induced multiphoton fluorescence of hemoglobin, 329
Heme oxygenase
tin-protoporphyrin and neonatal jaundice, 127
Human skin
UV-induced unscheduled DNA synthesis in human skin: dose response, correlation with erythema, time course and split dose exposure *in vivo*, 33
Hydrogen peroxide
flavin-mediated photoinactivation of spinach leaf nitrate reductase involving superoxide radical and activating effect of hydrogen peroxide, 195
Hydrophobic drugs
delivery systems for hydrophobic drugs, 494

Image analysis
ecological consequences of photomovement in microorganisms, 385
Image processing
application of video and image processing to the light microscope, 495
Internal brightness
internal brightness of disk-shaped samples, 337
Isotropic probes
light dosimetry: status and prospects, 149

Jaundice
tin-protoporphyrin and neonatal jaundice, 127

Kalanchoe marmorata
internal brightness of disk-shaped samples, 337

Lasers
fluorescence of proteins induced by two-photon absorption, 223
laser-induced multiphoton fluorescence of hemoglobin, 329

Life cycle
oxygen evolution of synchronous *Chlorella* under continuous and flash illumination, 447
pigment–protein complexes of green algae: improved methodological steps for the quantification of pigments in pigment–protein complexes derived from the green algae *Chlorella* and *Chlamydomonas*, 475
Light absorption
light dosimetry: status and prospects, 149
Light–dark redox reactions
oxidation–reduction kinetics of cytochrome *f* in whole cells, 45
Light dosimetry
light dosimetry: status and prospects, 149
Light-induced absorbance changes
biphasic fluence-response curves and derived action spectra for light-induced absorbance changes in *Phycomyces* mycelium, 169
Light-induced germination
light-induced fern-spore germination: effect of spore age on responsivity to light, 415
Light microscope
application of video and image processing to the light microscope, 495
Light scattering
light dosimetry: status and prospects, 149
Liposomes
photoinduced electron transfer in pheophytin-containing liposomes, 85
Luminescence
on the problems involved in detecting luminescence from singlet oxygen in biological specimens, 371

Metalloporphyrins
tin-protoporphyrin and neonatal jaundice, 127
Methyl viologen
photoinduced electron transfer in pheophytin-containing liposomes, 85
Merocyanine 540
singlet oxygen production and photoisomerization: two competitive processes for merocyanine 540 irradiated with visible light, 437
Multiphoton fluorescence spectrum
laser-induced multiphoton fluorescence of hemoglobin, 329

Near-UV radiation
partial tRNA deacylation specifically triggers *Escherichia coli* cell volume reduction, 13
Night-blind mutants
light-induced absorbance changes in extracts of *Phycomyces* sporangiophores: modification in night-blind mutants, 305
Nitrate reductase
flavin-mediated photoinactivation of spinach leaf nitrate reductase involving superoxide radical and activating effect of hydrogen peroxide, 195
Nitrogen deficiency
phototaxis in the marine flagellate *Cryptomonas maculata*, 115
NMR
photoreactivation of the thymine dimer containing DNA octamer d(GCGT$\hat{T}$TGCG).d(CGCAACGC) by the photoreactivating enzyme from *Anacystis nidulans*, 323
Null method
light-induced fern-spore germination: effect of spore age on responsivity to light, 415

Optical properties of tissues
light dosimetry: status and prospects, 149
Optoacoustic spectroscopy
radiationless processes measured by laser-induced optoacoustic spectroscopy (LIOAS), 375
Oxygen-evolving system
oxygen evolution of synchronous *Chlorella* under continuous and flash illumination, 447
Oxy radicals
the effects of enzymes on the photobleaching of fluorescein and fluorescein isothiocyanate conjugates, 361
Ozone depletion
ozone depletion and skin cancer, 493

P_{fr} decay
light-induced fern-spore germination: effect of spore age on responsivity to light, 415
Pheophytin
photoinduced electron transfer in pheophytin-containing liposomes, 85
Philodendron scandens
internal brightness of disk-shaped samples, 337
Photoadducts
photodimerization of 4,6,4′-trimethylangelicin and 6,5-dimethylangelicin, 213
Photobleaching
ecological consequences of photomovement in microorganisms, 385
photoproducts formed from Photofrin II in cells, 429
the effects of enzymes on the photobleaching of fluorescein and fluorescein isothiocyanate conjugates, 361
Photochemotherapy
tin-protoporphyrin and neonatal jaundice, 127
Photo-cross-links
tetrahydrobenzo-4,6-dimethylangelicin: a new angular furocoumarin forming inter-strand photo-cross-links, 123
Photocycle
charge motion in vacuum-dried bacteriorhodopsin, 469
Photodegradation
photoproducts formed from Photofrin II in cells, 429
Photodynamic effects
photodynamic effects of hematoporphyrin-derivative on enzyme activities of murine L929 fibroblasts, 61
Photodynamic therapy
what makes a good photosensitizer for photodynamic therapy?, 376
Photofrin II
porphyrin derivatives having physical and chemical characteristics similar to those of the active components of hematoporphyrin derivative and with very strong photosensitizing effects, 241
Photoisomers
singlet oxygen production and photoisomerization: two competitive processes for merocyanine 540 irradiated with visible light, 437
Photomechanical transducer
photomechanical transduction in *Amoeba proteus*: an action spectrum, 203
Photomotile response
photomechanical transduction in *Amoeba proteus*: an action spectrum, 203
photomotile responses of *Blepharisma japonicum* I: Action spectra determination and time-resolved fluorescence of photoreceptor pigments, 75
Photomovement
ecological consequences of photomovement in microorganisms, 385
phototaxis in the marine flagellate *Cryptomonas maculata*, 115
Photo-oxidation
photoproducts formed from Photofrin II in cells, 429
Photopigments
Photomotile responses of *Blepharisma japonicum* I: Action spectra determination and time-resolved fluorescence of photoreceptor pigments, 75
Photoreactivating enzymes
photoreactivation of the thymine dimer containing DNA octamer d(GCGT$\hat{T}$TGCG).d(CGCAACGC) by the photoreactivating enzyme from *Anacystis nidulans*, 323
Photoreception
photomotile responses of *Blepharisma japonicum* I: Action spectra determination and time-resolved fluorescence of photoreceptor pigments, 75
Photoreceptor pigments
light-induced absorbance changes in extracts of *Phycomyces* sporangiophores: modification in night-blind mutants, 305
Photoreceptors
the role of flavins as photoreceptors, 277
Photosensitivity
photomechanical transduction in *Amoeba proteus*: an action spectrum, 203
Photosensitization
porphyrin derivatives having physical and chemical characteristics similar

to those of the active components of hematoporphyrin derivative and with very strong photosensitizing effects, 241
singlet oxygen production and photoisomerization: two competitive processes for merocyanine 540 irradiated with visible light, 437
tin-protoporphyrin and neonatal jaundice, 127
two-step photoactivation of hematoporphyrin by excimer-pumped dye-laser pulses, 181
Photosystem I
the topological origin of the R and S phases of electric-field-induced luminescence in chloroplasts and blebs, 295
Photosystem II
the topological origin of the R and S phases of electric-field-induced luminescence in chloroplasts and blebs, 295
Photosynthesis
oxidation–reduction kinetics of cytochrome *f* in whole cells, 45
Phototaxis
ecological consequences of photomovement in microorganisms, 385
phototaxis in the marine flagellate *Cryptomonas maculata*, 115
Phototherapy
tin-protoporphyrin and neonatal jaundice, 127
Phototoxicity
phototoxic effects of bilirubin, 373
Phototropism
biphasic fluence-response curves and derived action spectra for light-induced absorbance changes in *Phycomyces* mycelium, 169
light-induced absorbance changes in extracts of *Phycomyces* sporangiophores: modification in night-blind mutants, 305
Phycobiliproteins
phototaxis in the marine flagellate *Cryptomonas maculata*, 115
Phycomyces
biphasic fluence-response curves and derived action spectra for light-induced absorbance changes in *Phycomyces* mycelium, 169
light-induced absorbance changes in extracts of *Phycomyces* sporangiophores: modification in night-blind mutants, 305
Phytochrome
light-induced fern-spore germination: effect of spore age on responsivity to light, 415
Picosecond kinetics
synchronous cultures of the green alga *Scenedesmus obliquus*: comparison of picosecond decay associated emission spectra and fluorescence induction kinetics, 247
Pigment composition
pigment–protein complexes of green algae: improved methodological steps for the quantification of pigments in pigment–protein complexes derived from the green algae *Chlorella* and *Chlamydomonas*, 475
Pigment–protein complexes
pigment–protein complexes of green algae: improved methodological steps for the quantification of pigments in pigment–protein complexes derived from the green algae *Chlorella* and *Chlamydomonas*, 475
Plexiglass disks
internal brightness of disk-shaped samples, 337
Porphyrins
photoproducts formed from Photofrin II in cells, 429
time-resolved fluorescence spectroscopy of hematoporphyrin, mesoporphyrin, pheophorbide *a* and chlorin e_6 in ethanol and aqueous solution, 103
Proteins
fluorescence of proteins induced by two-photon absorption, 223
Proximity effect
triplet state properties and triplet-state-oxygen interactions of some linear and angular furocoumarins, 315

Quercetin
inhibition of chloroplast photo-oxidation by flavonoids and mechanisms of the antioxidative action, 451

Radiationless processes
radiationless processes measured by laser-induced optoacoustic spectroscopy (LIOAS), 375

Ray tracing
internal brightness of disk-shaped samples, 337
Redox regulation
flavin-mediated photoinactivation of spinach leaf nitrate reductase involving superoxide radical and activating effect of hydrogen peroxide, 195
Reflectance spectroscopy
diffuse reflectance spectroscopy: an application to the analysis of art works, 132
Role of water
charge motion in vacuum-dried bacteriorhodopsin, 469
Rutin
inhibition of chloroplast photo-oxidation by flavonoids and mechanisms of the antioxidative action, 451

Scenedesmus obliquus
synchronous cultures of the green alga *Scenedesmus obliquus*: comparison of picosecond decay associated emission spectra and fluorescence induction kinetics, 247
Schiff bases
charge motion in vacuum-dried bacteriorhodopsin, 469
Singlet oxygen
photophysical studies of bacteriochlorophyll *a* and bacteriopheophytin *a* — singlet oxygen generation, 93
singlet oxygen production and photoisomerization: two competitive processes for merocyanine 540 irradiated with visible light, 437
triplet state properties and triplet-state-oxygen interactions of some linear and angular furocoumarins, 315
Skin cancer
ozone depletion and skin cancer, 493
Spectrophotometry
biphasic fluence-response curves and derived action spectra for light-induced absorbance changes in *Phycomyces* mycelium, 169
Spinacia oleracea
flavin-mediated photoinactivation of spinach leaf nitrate reductase involving superoxide radical and activating effect of hydrogen peroxide, 195
Spore age
light-induced fern-spore germination: effect of spore age on responsivity to light, 415
Substrate binding site
comparative characterization of the substrate-binding subsites in subtilisins DY and Carlsberg by fluorescence and kinetic studies, 461
Subtilisins
comparative characterization of the substrate-binding subsites in subtilisins DY and Carlsberg by fluorescence and kinetic studies, 461
Superoxide dismutase
the effects of enzymes on the photobleaching of fluorescein and fluorescein isothiocyanate conjugates, 361
Superoxide radical
flavin-mediated photoinactivation of spinach leaf nitrate reductase involving superoxide radical and activating effect of hydrogen peroxide, 195
Synchronous culture
synchronous cultures of the green alga *Scenedesmus obliquus*: comparison of picosecond decay associated emission spectra and fluorescence induction kinetics, 247

Thymine dimers
photoreactivation of the thymine dimer containing DNA octamer d(GCGT$\hat{T}$TGCG).d(CGCAACGC) by the photoreactivating enzyme from *Anacystis nidulans*, 323
Time-resolved fluorescence
time-resolved fluorescence spectroscopy of hematoporphyrin, mesoporphyrin, pheophorbide *a* and chlorin e_6 in ethanol and aqueous solution, 103
Tin-protoporphyrin
tin-protoporphyrin and neonatal jaundice, 127
Transmembrane electron transfer
photoinduced electron transfer in pheophytin-containing liposomes, 85
tRNA acylation
partial tRNA deacylation specifically triggers *Escherichia coli* cell volume reduction, 13

Triplet states
triplet state properties and triplet-state-oxygen interactions of some linear and angular furocoumarins, 315
Tryptophan
two-step photoactivation of hematoporphyrin by excimer-pumped dye-laser pulses, 181
Tumour localization
porphyrin derivatives having physical and chemical characteristics similar to those of the active components of hematoporphyrin derivative and with very strong photosensitizing effects, 241
Two-photon fluorescence
fluorescence of proteins induced by two-photon absorption, 223
Two-photon fluorescence spectrum
laser-induced multiphoton fluorescence of hemoglobin, 329
Two-step photoactivation
two-step photoactivation of hematoporphyrin by excimer-pumped dye-laser pulses, 181

Unscheduled DNA synthesis
UV-induced unscheduled DNA synthesis in human skin: dose response, correlation with erythema, time course and split dose exposure *in vivo*, 33
UV-B radiation
ecological consequences of photomovement in microorganisms, 385
UV erythema
UV-induced unscheduled DNA synthesis in human skin: dose response, correlation with erythema, time course and split dose exposure *in vivo*, 33

Video
application of video and image processing to the light microscope, 495
ecological consequences of photomovement in microorganisms, 385
phototaxis in the marine flagellate *Cryptomonas maculata*, 115
Vitamin E radical cation
a CIDEP and fluorescence study of the oxidation of vitamin E: the vitamin E radical cation, 229
